

Fluid Handling

Technology

HOSE COUPLING AND TUBE FABRICATION

HEAVY/MEDIUM TRUCK • SPECIALTY CHASIS • DEFENSE • COMMERCIAL/TURF

Specialized in low volume programs and responsive project management

PRODUCTS

- Hydraulic brake hose & tube
- Compressed air
- Power steering
- Fuel lines
- Coolant hose

CORE PROCESSES

- Radial and press crimping
- Tube end forming
- Conventional CNC bending
- Robotic CNC bending
- Dedicated hand bending fixtures
- Cut-to-length tube processing
- Nylon tube stripping/de-coating
- Romer tube inspection arm
- Dedicated attribute gaging
- Destructive and non-destructive testing

ROBOTIC CNC BENDING

Have complicated bends done cost-effectively and with consistent quality.

Our Robotic CNC Bender gives us the ability to do bends that couldn't normally be done in a machine. Day in and day out we can quickly produce your complicated parts with high precision and consistent quality.

Because of the flexibility and consistency robotic CNC bending offers, we can support the production of new parts economically, giving you access to prototyping and short runs without large wait times and exorbitant costs.

ISO 9001:2008 REGISTERED

QUALITY PARTS START WITH QUALITY MATERIALS

We've been committed to high quality from the beginning, and to this day work to improve our products and processes to exceed our customers' requirements. At Fluid Handling Technology we only work with proven suppliers to ensure quality results for all of our custom and specialty applications.

Our assemblies are made with rubber hose made in the USA, and they all meet or exceed applicable standards, such as FMVSS 106 and SAE J1401.

MORE THAN MANUFACTURING

PROJECT MANAGEMENT

Trust our experts to provide full service project management to keep your program on track.

TECHNICAL CONSULTATION

We don't just sell assemblies, we help our clients find the optimal solution for their application.

LOW VOLUME IS NO PROBLEM

Don't get put on the back burner because you have a low volume or prototyping project.

QUICK TURNAROUND

Time is money. We'll get your project moving quickly so that you can meet production demands.

DON'T GET LOST IN THE SHUFFLE

At Fluid Handling Technology, we don't think you have to be huge to get the attention you deserve. We specialize in handling low volume programs, and we can support those programs with responsive project management and quick turnaround that is hard to find elsewhere.

Everything from our expert staff to our facility's technology is designed to give you consistently high quality, quickly, and cost effectively. Even for low volume and prototyping applications.
